Issues

1. Are the disputed services subject to a contractual agreement between the parties to this dispute?
2. What is the applicable rule for determining reimbursement for the disputed services?
3. What is the recommended payment amount for the services in dispute?
4. Is the requestor entitled to reimbursement?

Findings

1. The insurance carrier reduced or denied disputed services with reason code 00AA, "Reductions based on contract through AWCA." Review of the submitted information found insufficient documentation to support that the disputed services were subject to a contractual fee arrangement between the parties to this dispute. Nevertheless, on October 6, 2010, the Division requested the respondent to provide a copy of the referenced contract as well as documentation to support notification to the healthcare provider, as required by 28 Texas Administrative Code §133.4, that the insurance carrier had been given access to the contracted fee arrangement. Review of the submitted information finds that the documentation does not support notification to the healthcare provider in the time and manner required. The Division concludes that, pursuant to §133.4(g), the insurance carrier is not entitled to pay the health care provider at a contracted fee. Consequently, per §133.4(h), the disputed services will be reviewed for payment in accordance with applicable Division rules and fee guidelines.
2. This dispute relates to facility services performed in an outpatient hospital setting with reimbursement subject to the provisions of 28 Texas Administrative Code §134.403, which requires that the reimbursement calculation used for establishing the maximum allowable reimbursement (MAR) shall be the Medicare facility specific amount, including outlier payment amounts, determined by applying the most recently adopted and effective Medicare Outpatient Prospective Payment System (OPPS) reimbursement formula and factors as published annually in the Federal Register with the application of minimal modifications as set forth in the rule. Per §134.403(f)(1), the sum of the Medicare facility specific reimbursement amount and any applicable outlier payment amount shall be multiplied by 200 percent, unless a facility or surgical implant provider requests separate reimbursement of implantables. Review of the submitted documentation finds that separate reimbursement for implantables was not requested.
3. Under the Medicare Outpatient Prospective Payment System (OPPS), each billed service is assigned an Ambulatory Payment Classification (APC) based on the procedure code used, the supporting documentation and the other services that appear on the bill. A payment rate is established for each APC. Depending on the services provided, hospitals may be paid for more than one APC per encounter. Payment for ancillary and supportive items and services, including services that are billed without procedure codes, is packaged into payment for the primary service. A full list of APCs is published quarterly in the OPPS final rules which are publicly available through the Centers for Medicare and Medicaid Services (CMS) website. Reimbursement for the disputed services is calculated as follows:
 - Procedure code 29826, date of service September 8, 2009, has a status indicator of T, which denotes a significant procedure subject to multiple-procedure discounting. The highest paying status T procedure is paid at 100%; all others are paid at 50%. This procedure is paid at 100%. These services are classified under APC 0042, which, per OPPS Addendum A, has a payment rate of \$3,251.11. This amount multiplied by 60% yields an unadjusted labor-related amount of \$1,950.67. This amount multiplied by the annual wage index for this facility of 0.9816 yields an adjusted labor-related amount of \$1,914.78. The non-labor related portion is 40% of the APC rate or \$1,300.44. The sum of the labor and non-labor related amounts is \$3,215.22 at 6 units, with multiple-procedure discount, is \$11,253.27. Per 42 Code of Federal Regulations

§419.43(d) and Medicare Claims Processing Manual, CMS Publication 100-04, Chapter 4, §10.7.1, if the total cost for a service exceeds 1.75 times the OPPS payment and also exceeds the annual fixed-dollar threshold of \$1,800, the outlier payment is 50% of the amount by which the cost exceeds 1.75 times the OPPS payment. Per the OPPS Facility-Specific Impacts file, CMS lists the cost-to-charge ratio for this provider as 0.24. This ratio multiplied by the billed charge of \$7,000.00 yields a cost of \$1,680.00. The total cost of all packaged items is allocated proportionately across all separately paid OPPS services based on the percentage of the total APC payment. The APC payment for these services of \$11,253.27 divided by the sum of all APC payments is 72.26%. The sum of all packaged costs is \$4,361.95. The allocated portion of packaged costs is \$3,151.79. This amount added to the service cost yields a total cost of \$4,831.79. The cost of these services exceeds the annual fixed-dollar threshold of \$1,800. The amount by which the cost exceeds 1.75 times the OPPS payment is \$0.00. The total APC payment for this line is \$11,253.27. This amount multiplied by 200% yields a MAR of \$22,506.54.

The sum of the labor and non-labor related amounts is \$3,215.22. The cost of these services does not exceed the annual fixed-dollar threshold of \$1,800. The outlier payment amount is \$0. - Procedure code 97001, date of service September 8, 2009, has a status indicator of A, which denotes services paid under a fee schedule or payment system other than OPPS.
